

OEC 9800 MD C-Arm

GE has taken the world leading mobile c-arm, the OEC 9800, to the next level. We've added motorized c-arm movements to the already best in class 1k x 1k high resolution imaging chain. Physicians now have full control of positioning which allows them to capture exceptional detail while maintaining control of the C. This means better images and faster procedure times allowing optimal use of staff and resources

The key to the fixed room quality images that are generated by the OEC 9800 is the high resolution image capture and display. The OEC 9800 digitally captures the x-ray signal and processes that information, without any loss of data for a display that shows outstanding vascular or skeletal detail.

The OEC 9800 MD is a fully integrated imaging system that meets any clinical challenge by incorporating true 1k x 1k imaging with increased heat management and multiple options to control dose.

- 36 Months \$2,584.99 The cost to maintain this OEC 9800 plus MD is \$86.00 per day
- 60 Months \$ 1778.61 The cost to maintain the OEC 9800 plus MD is \$59.00 per day
